CONTEXTOPS · THE PROBLEM

Companies are pouring money into AI coding tools, and can’t tell what it buys.

86%

of engineering leaders can't say which AI tools pay off

2028

AI coding costs pass the average developer salary

98%

of FinOps teams now manage AI spend, up from 31%

> Why it matters: engineering managers now own a budget that grows every month, with no way to tie it to what actually shipped.

CONTEXTOPS · THIS SEMESTER

From research to a working product

01 Researched

2,200+ engineer posts and 35 startup ideas scored. This one won every round.

02 Built

A working MVP that ties Claude Code, Cursor and Copilot spend to merged code, and fixes waste in one click.

03 Next

20 customer interviews and 5 design partners.
